

Oregon State Board of Nursing Selects EDvera™ Regulatory Management System

Workflow Automation Software Used to Streamline Statewide Education Program Approvals - Saving Time and Money

(Columbus OH, October 11, 2022) [The Oregon State Board of Nursing](#) is responsible for approving and regulating nursing education and nursing assistant training programs. In addition, OSBN issues licenses and renewals, investigates complaints, maintains the nursing assistant registry, administers competency evaluations for nursing assistants, and provides testimony in support of the legislature and other organizations.

Public safety is the Board's mission and improving efficiency and service levels are priorities for the agency. Until now, reviewing various education program applications has been mostly a manual process. With market-leading workflow automation software from [EDvera](#) OSBN can streamline and simplify the management of applications and request forms, along with the processes associated with approvals, compliance audits, and reporting.

“Specialized technology is helping our staff be more productive while ensuring safe nurse and nursing assistant education.” - Ruby Jason, Executive Director

Interest in EDvera has recently surged, gaining new urgency with the advent of remote/virtual work and growing public demand for timely access requests for information. Visit EDvera.com for details on how EDvera's accreditation and licensing management software can work for you and your organization, or contact [Pam Hammers](#), VP Sales, directly for more information.
